

## **News Flash: MAS, ACRA AND SGX INTRODUCE CHINESE EDITION OF "GUIDEBOOK FOR AUDIT COMMITTEES"**

The Monetary Authority of Singapore (MAS), the Accounting and Corporate Regulatory Authority (ACRA) and SGX launched the English edition of "ACGC Guidebook for Audit Committees in Singapore" in late 2008. Following on from there, KPMG Audit Committee Institute (ACI), one of the key content contributors, was engaged to translate the guidebook into the Chinese language to reach Chinese-speaking directors not only in Singapore, but globally.

The unique and comprehensive document addresses key issues such as risk management, fraud, and the composition of the audit committee. Developed with inputs from leading industry professionals, the guidebook serves as practical and useful reference for audit committee members, company directors, and all who are involved in corporate governance. The guidebook also includes tools, such as frequently-asked-questions, case studies, red flags, and sample forms, to assist directors in better assessing and managing various situations in the course of their duties.

For greater convenience, online version of the Guidebook is made accessible on the MAS, ACRA and SGX websites. A print version of the *Chinese Guidebook* will be made available to SGX-listed companies soon.
